Digital Marketing	: SEO, Google Webmaster tool, Google Analytics , Affiliate marketing, Social Media Marketing

Projects:

1. Name: City Directory

Technology: PHP MVC Framework

Duration : July 2018 – August 2018

Description: It is actually an application which provides listing of different categories like banks, theatres, hospitals, clubs around you by fetching your current location. In this project I developed REST APIs to fetch data and admin panel so owner of the app can change images, order of listing, add new category and also set/unset is featured option for listing a specific place.

2. Name: Leave & Attendance Management System (LAMS)

(4 members)

Technology: PHP MVC Framework

Duration : August 2018 – Present

Description: It is centralised web based HR system we designed for a company which is having its employee strength around 10,000 all over the country. In this portal employee can apply leave, view their attendance, on other hand manager or HR view record of

particular employee as well as their team. In apply leave module there is bunch of leave types and its rules which is the most challenging part of this project so far.

3. Name: Complaint Buddy (3 members)

Technology: PHP

Duration : November 2017 – February 2018

Description : This System provides an online way of solving the complaints faced by the end user by saving time and effective handling of complaints. This can be use for company's improvement and growth.

Achievements and Certification:

- Completed **HTML5 and CSS3** course on Edx.org. (November 2016)
